## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group II, Figures 8-18 in the reply filed on 7/28/05 is acknowledged.

However, it is noted that claims 6 and 16 are directed to the Group II invention, not generic as indicated by Applicant, since they recite the "first abutment member" which is clearly presented in the Group II embodiment.

### ***Specification***

2. The abstract of the disclosure is objected to because it exceeds 150 words. Correction is required. See MPEP § 608.01(b).

### ***Drawings***

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: diameter "D2". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37

Art Unit: 3676

CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The diameter "D2" is not labeled in the drawings and therefore is not understood with respect to the claims or disclosure.

6. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. The claims are replete with antecedent problems, some examples of which are set forth below. In claim 1, lines 1 and 5 present confusing recitations: in line 1 a housing is set forth, yet in line 5,

Art Unit: 3676

"a member" for supporting the core is set forth, which would necessarily be the housing. In the same vein, in claim 1, line 5 a blocking groove is set forth, yet in line 16, "at least one blocking groove" is recited. Furthermore, in line 7, "the periphery", line 14, "that axial side" and in the penultimate line, "the direction of the disengagement axial displacement" all lack antecedent basis. In claim 5, line 2, "the same acute angle" lacks antecedent and in line 3, "a symmetry plane" is not understood. In claim 6, line 3, "the position" and line 3 and 7, "the entraining member" lack antecedent. In claim 7, last line, "the entraining member" lacks antecedent. In claim 8, line 6, "its second annular groove lateral surface", line 10, "it" is indefinite, line 11, "the bottom" and line 12, "the maximum by a distance" lack antecedent. Claims 11-20 present many of the same problems.

### ***Allowable Subject Matter***

6. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art of record fails to teach the lateral surfaces on blocking grooves 13 formed within the cylinder housing as recited in claims 1 and 11 specifically.
